COURSEWORK

GRADUATE
- Data Structure
- Object Oriented Programming
- JavaScript & JavaScript Libraries
- Analysis and Design of Algorithms
- Web performance optimization
- DOM Manipulation
- Website or Application implementation
- Version Control

ACHIEVEMENTS

ACADAMIC
2nd in School in X Examination with **84.8%**
Identified & resolved a bug in the college website, demonstrating strong problem-solving and technical skills.

CODING
Solved **100+** problems in Leetcode & GeekforGeeks with handle jdpraveen201 & jdpravewapt.

EDUCATION

GURUNANAK COLLEGE
Master in Computer Application
Chennai, TamilNadu
Cum.GPA: 8.01 | Grad.Sept 2020

TNC COLLEGE
BS in Computer Science
Chennai, TamilNadu
Cum.GPA: 6.72 | Grad.Sept 2017

EXPERIENCE

CCLYTICS | Development & Support Engineer
Sept 2021 - Present | Chennai, TamilNadu
- Leveraged strong support engineering background to provide comprehensive assistance to users and resolve issues in applications.
- Applied analytical skills to troubleshoot and resolve complex issues, fostering a proactive approach to problem-solving.
- Demonstrated expertise in monitoring application health, servers, and services, contributing to the maintenance and enhancement of overall system functionalities.
- Demonstrated leadership during critical incidents by initiating bridge calls, coordinating with relevant teams, and ensuring swift resolution, highlighting a proactive and solution-oriented approach.
- Actively participated in **React.js projects**, contributing to the development and enhancement of user interfaces and functionality, demonstrating a hands-on approach to coding and development tasks.
- Gained exposure to coding practices within React.js projects, developing an understanding of front-end development principles and contributing effectively to code reviews and enhancements.

PROJECT

USEPOPCORN | Movie search, Watchlist management, and personalized ratings | ○ Github
JAN 2024
- Developing a user-friendly movie platform where users can effortlessly search for films, add them to their watchlist and rate them.
- Leveraging the TMDB API to fetch movie data, this project extensively utilizes hooks and custom hooks for efficient state management.
- </>Tech stack:**Reactjs, Javascript,HTML,CSS.**

TRAVEL LIST | Add essential items to travel plan | ○ Github
JAN 2024
- Designed and developed a user-friendly travel planning application to simplify the packing process.
- The application serves as a tool for adding essential items to a travel plan. Users can easily add items to their list and mark them as packed once they are ready, streamlining the packing process
- </>Tech stack:**Reactjs, Javascript,HTML,CSS.**

EAT & SPLIT | split bills with friends | ○ Github
DEC 2023
- An application empowers users to manage their expenses efficiently, providing a convenient platform for seamlessly bill splitting with friends, simplifying the process of dividing expenses among a group.
- </>Tech stack:**Reactjs, Javascript.**

LOGIN & REGISTRER | User can login and Register | ○ Github
NOV 2023
- Login and Register application using React, integrated backend APIs to make the website dynamic
- </>Tech stack:**Javascript,ReactJS,Google FireBase,Rest API,**
